Seminars Description:

The Legislation for Ballast Water Management (Ballast Water Management Convention, USCG Ballast water program, EPA compliance) requires that ships should properly manage their Ballast Water, in order to prevent the spread of invasive species as well as potentially harmful pathogens.

There are various technologies used to treat ballast water meaning to reduce living organisms discharge below IMO and USCG limits. Being aware of its overall operation and components function is of utmost importance, in order to be operated by a vessel's crew.

In this seminar the following topics will be issued:

- Legislation
- Technologies
- Operation
- Compliance, Monitoring and Enforcement

Who should attend:

The seminar is addressed to all Merchant Marine Officers and Maritime Professionals.

Facilitator:

Mr. Iordanis Papazoglou

Technical Instructor &
Assessor

A Certificate of Compliance will
be issued after the end of the
2 days seminar from
Theta Training Center approved
by **ABS**.
