Seminar's Description:

This seminar is intended to provide participants with an understanding of vetting inspections for tanker vessels.

The seminar aims to familiarize participants with the system of vetting and its procedures so that they can prepare their vessels accordingly to minimize the opportunity for unexpected and/or unnecessary observations that may adversely impact the vessel's chartering prospects.

Highlights:

- Introduction to vetting, definitions and background
 - Ship Inspection Report Program (SIRE)
 - Minimum safety criteria
- Itemized standard process for a vetting inspection (VIQ)
 - Points of attention
 - Observations of high risk

Facilitator:
Capt. Michael Perakis
Master Mariner

A Certificate of Attendance will be issued after the end of the seminar from Theta Training Center approved by
